

STATISTICS UPDATE: INTERNATIONAL MIGRATION

JANUARY 2013 HIGHLIGHTS

Figure 1: Air and Day visitors: January 2012 to January 2013

- There was a significant rise in day visitors (cruise ship) over January 2012. The total number of cruise ship visits remained at 16 over this period. This increase was mainly due to a rise in the average number of passengers on each visiting cruise ship, carrying an average number of 2,093 passengers compared to 1,696 in January 2012.
- Cruise ship tourists continue to make up the largest proportion of international visitors to Vanuatu, accounting for 81% of total visitors.
- International visitor air arrivals decreased by 13% from 8,755 visitors in January 2012 to 7,612 visitors in January 2013. This was attributed to a drop of 13% in holiday visitors over the same period: January is a low period for air arrivals.

PURPOSE OF VISIT FOR VISITORS ARRIVING BY AIR

- During January, records show 83% of visitors were travelling for holidays, 8% to visit family and friends, 8% arrived for business, meetings and conferences hosted in the country and 1% transited through Vanuatu.

COUNTRY OF USUAL RESIDENCE FOR VISITORS ARRIVING BY AIR

Figure 2: Share of visitors by Country of Usual Residence to total visitors in January 2013

- Australia continues to be the number one source of visitors to Vanuatu accounting for 60% of total visitors by air in January 2013, followed by New Caledonia at 19%, New Zealand at 8%, Europe at 5%, other Pacific countries and other countries at 3% each, and North America at 2% (Figure 2).
- Tourism in Vanuatu is seasonal, and it is difficult to analyse changes in international arrivals and country of residence by looking at the monthly number of arrivals. Figure 3 over, shows the total number of visitor arrivals and arrivals from Australia, New Zealand, New Caledonia and all other countries combined to show trends in arrivals, with the number of visitors based on an index value of 100 in January 2005. This index allows analysis over time of the real increases and decreases in international air arrivals.

Figure 3: Index of Total Visitor Arrivals, January 2010 – January 2013 (January 2005 = 100)

- Figure 3 shows the trend of an increase in visitor arrivals to Vanuatu, with the 'high season' which typically occurs between July and September each year. The index shows the overall trend for increasing visitor arrivals, and a decrease in the number of visitors in January 2013 compared with January 2012 with a 13% decrease in the index value.

Australia

New Zealand

New Caledonia

All other countries

Note: the vertical axis scale varies in each country chart.

- The index values for the three major tourism markets of Australia, New Zealand and New Caledonia show lower numbers of visitors in January 2013 compared to same month of last year, decreasing by 19%, 18% and 2% respectively over the corresponding month of 2012. The decrease in index values shows January low in this segment of the market this month is attributed to a drop in air

visitor arrivals into the country with the exception of New Caledonia which peaks in December and begins to decline in January.

AVERAGE LENGTH OF STAY FOR VISITORS ARRIVING BY AIR

- In January 2013, the records show an increase in the average intended length of stay for visitors at 0.7 days from 10.7 days to 11.4 days over the corresponding month of 2012. Moreover, the figures increased by 0.6 days from 10.8 days to 11.4 days over December 2012. There was a drop in the number of tourists over January 2012 but they stayed longer when compared to the previous month.

AVERAGE AGE OF VISITORS ARRIVING BY AIR

- The figures of January 2013 showed a rise in visitors' average age, increasing by 4.5 years from 35.2 years to 39.8 years over January 2012. Moreover, figures showed an increase to 39.8 years from 36.8 years over December 2012.
