

STATISTICS UPDATE: OVERSEAS TRADE

JANUARY 2014 HIGHLIGHTS

Figure 1: Terms of trade January 2014 and January 2013 (Million Vatu)

Vanuatu's trade deficit (the excess of imports over exports) in January 2014 stood at vatu 1,635 million indicating an improvement of vatu 624 million over January 2013 from vatu 2,258 million. Total imports decreased by 17% or 441 million from vatu 2,534 million in January 2013 to vatu 2,093 million in January 2014. The decrease in the trade balance was caused by the decrease in imports for home consumption by 17% or vatu 425 million from vatu 2,518 million to vatu 2,093 million over January 2013.

Domestic exports earnings (excluding re-exports) for January 2014 increased by 66% or vatu 182 million over January 2013 from vatu 276 million to vatu 458 million. The increase was mostly attributed to a large shipment of copra exported in the month of January 2014.

Figure 2: Overseas trade exports and imports for home consumption (million vatu)

EXPORTS

In January 2014, for the main export commodities, Copra constituted the largest share in value at 49% followed by coconut oil 13%, live fish 9%, kava 7%, and other products 10%, while the rest of the export group made up less than 5% each. Other products comprised of Azure Pure Water, citrus fruits (tahitian limes), tamanu oil and personal effects. (See attached Table 2, Table 3)

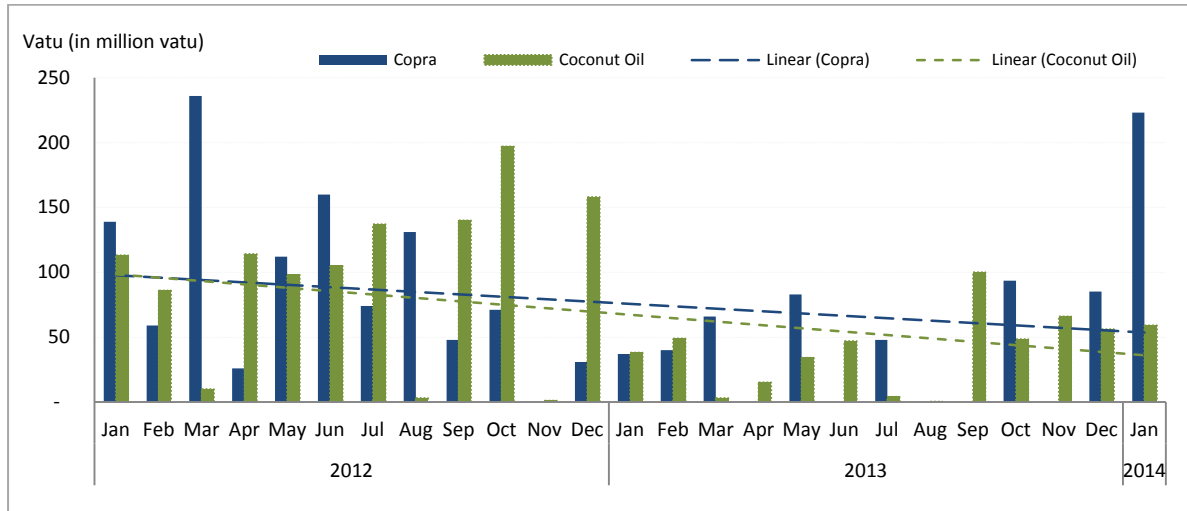

Figure 3: Exports of Coconut Products (million vatu)

Coconut products exports in value recorded increases for copra, totalling to 223 million vatu in January 2014, as compared to 37 million vatu in January 2013. The bulk of copra exports are mainly to Indonesia and Philippines. Coconut oil exports also recorded an increase of 54% or 21 million vatu from 38 million vatu in January 2013 to 59 million vatu in January 2014. However, coconut meal decreased by 0.7 % in January 2014 compared to January 2013.

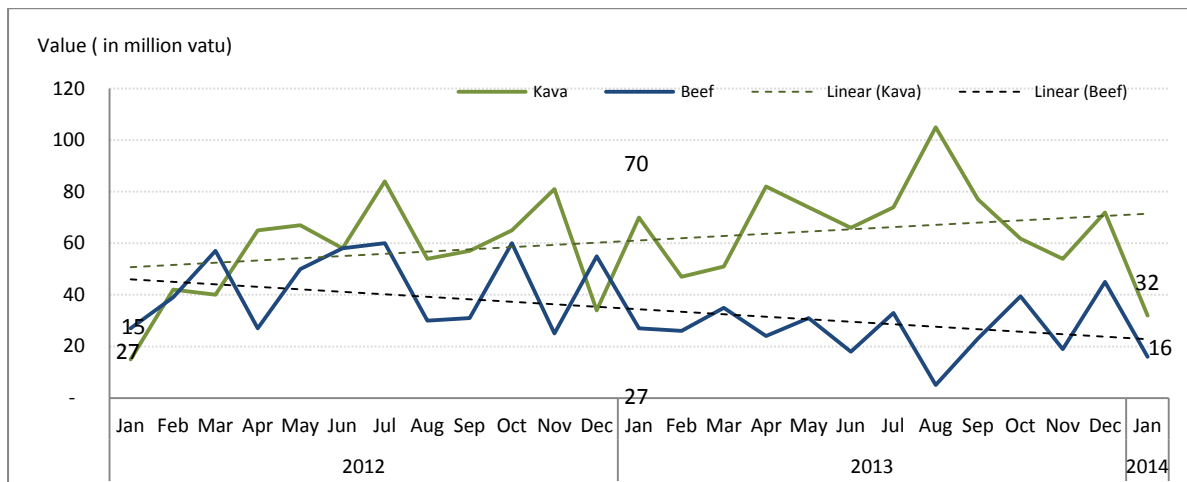

Figure 4: Exports of Kava and Beef Products (million vatu)

Earnings from Kava export went down from 70 million vatu in January 2013 to 32 million vatu in January 2014, representing a decrease of 54% or 37 million vatu. Meanwhile beef export earnings also decreased by 42% or 11 million vatu in January 2014 compared to 27 million vatu in January 2013. This decrease is attributed to low supply by local farmers to the abattoirs over the same period of 2013. The bulk of kava exports this month were mainly to New Caledonia, United States of America and Fiji, while most of the beef were destined for Papua New Guinea and Japan.

IMPORTS

In terms of imports by commodity groups, mineral fuels registered the largest value (C.I.F) at vatu 513 million or 24% of the total imports for home consumption, followed by machines and transport 20% or vatu 420 million, food and live animals 17%, basic manufactured goods 15%, miscellaneous goods 10%, chemical products 8% and other products such as, beverages and tobacco, crude materials, goods not classified elsewhere and oils and fats made up less than 5% each of the total imports for home consumption over the month of January 2014.

In January 2014, mineral fuels from the import groups increased by 28% or 111 million vatu in value over January 2013. Meanwhile the rest of the commodity group that decreased were: food and live animals (-40%), beverages and tobacco (-30%), machines and transport (-26%), miscellaneous goods (-23%), chemical products (-14%), and basic manufactured goods (-9%) respectively.

The distribution of goods by country grouping was stable over the same period in January 2013. Australia, Singapore and Fiji were the main countries of imports in January 2013; however exhibited a few changes in position for Fiji occurred in January 2014. Imports from Australia and Singapore remain stable while Fiji decreased by 42% in imports for home consumption over January 2013.

REVISIONS TO IMPORTS AND EXPORTS STATISTICS

The Vanuatu National Statistics Office receives import and export statistics data on quantity and value from the Department of Customs and Inland Revenue's ASYCUDA merchandise trade processing system. On occasion revisions are made to import and export entries after publication. The Vanuatu National Statistics Office makes every possible effort to check the data and resolve inconsistencies and anomalies with colleagues from the Department of Customs and Inland Revenue prior to publishing. Where revisions are necessary these are highlighted in the statistical tables.

CONCEPTS AND DEFINITIONS

- **Imports for Home Consumption** are goods, materials or articles purchased in other countries and brought into Vanuatu and cleared through customs procedures for home consumption. Imports for home consumption are valued on a C.I.F. (cost, insurance, freight) basis. This means that for each commodity, the value recorded includes the factory price, the cost of packaging, the freight cost from overseas to Vanuatu ports and the insurance.
- **Exports** are expressed in F.O.B. (free on board) prices. It means the total value includes the production cost and the transport cost to the Vanuatu port of export.
- **Imports for re-export** refers to imports destined to be re-exported without having undergone any transformation, or only minor ones. This is especially the case of duty free goods and fuel "imported" into the country and sold to non-resident airline operators or ships.
- **Re-exports** are goods, materials or articles exported in the same condition as they were imported, and imported goods, which have undergone operations such as repair, repacking, or bottling which leave them essentially unchanged before exporting.
