

## VNSO Update Overseas Trade, January 2010

*Concepts and definitions for Vanuatu International Merchandise Trade statistics, sourced from the Customs and Inland Revenue Department (CIRD) data system (ASYCUDA), have undergone a major revision as part of the National Accounts Rebasement undertaken in 2009. The definitions for what constitutes an import for home consumption and an export are now consistent with international standards. The data series were reviewed and redeveloped from 1998 to date. There has also been a major improvement in the data exchange system between the CIRD and VNSO which has facilitated the data auditing, and a subsequent improvement in the data consistency checks for the series.*

### Monthly Trade

According to the January 2010 provisional trade figures, the trade deficit stood at 1,572 million vatu indicating a deterioration of 42 million vatu compared to January 2009 but an improvement in the trade deficit of 831 million vatu when compared to December 2009

In January 2010 total imports decreased by almost 22% from 2,358 million vatu in January 2009 to 1,852 million vatu. This was due to a decrease of 22% in Imports for Home Consumption from 2,358 million vatu in January 2009 to 1,835 million vatu in January 2010.

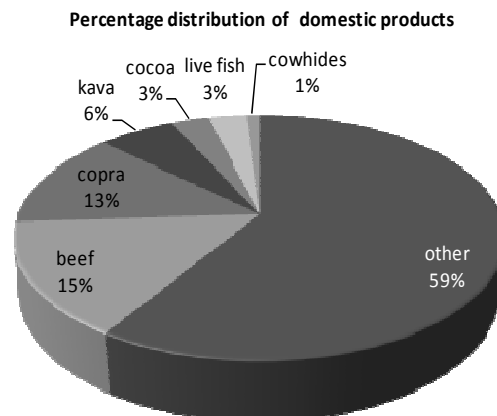

Domestic exports (excluding re-exports) for January increased by almost 11% compared to the same period in 2009 from 239 to 264 million vatu.

Copra exports increased by almost 14% in quantity from 930 tons to 1,057 tons compared to January 2009. However, due to a decrease in price, copra exports value slightly increased by 6% over the same period in 2009.

### Key Commodities

In January 2010, Beef constituted 15% by total value, Copra 13%, and Other items 59%. Other includes seasonal products such as Citrus, Essential oils, Fresh frozen fish, and Personal household effects as well as many other types of items.

In terms of types of items imported, in the month of January 2010, significant decreases occurred in mineral fuels (78%), Goods not classified elsewhere (71%), Miscellaneous (65%), Oils fats and waxes (50%), Beverages and tobacco (22%), Food and Live animals (10%), Basic manufactured products (1%), respectively over the same period in 2009. However Crude materials increased in value by 107% followed by machines and transport equipments by 7% respectively. Imports for Chemical products remained the same over the same period. Crude materials had the largest value (C.I.F) representing 36% of imports value followed by Food and live animals representing 20% of the value of the imports.

**Source of Statistics:** The Department of Customs and Inland Revenue provide the VNSO access to their ASYCUDA merchandise trade processing system to derive the imports and exports statistics included here.

## Concepts and definitions

- **Imports for Home Consumption** are goods, materials or articles bought in other countries and brought into Vanuatu and cleared through customs procedures for home consumption. Imports for home consumption are valued on a C.I.F. (cost, insurance, freight) basis. This means that for each commodity, the value recorded includes the factory price, the cost of packaging, the freight cost from overseas to Vanuatu ports and the insurance.
- **Exports** are expressed in F.O.B. (free on board) prices. It means the total value includes the production cost and the transport cost to the Vanuatu port of export.
- **Imports for re-export** refers to imports destined to be re-exported without having undergone any transformation, or only minor ones. This is especially the case of duty free goods and fuel “imported” into the country and sold to non-resident airline operators or ships.
- **Re-exports** are goods, materials or articles exported in the same condition as they were imported, and imported goods, which have undergone operations such as repair, repacking, or bottling which leave them essentially unchanged before exporting.
