

VNSO Update Overseas Trade, March 2010

March Highlights

According to the March 2010 provisional trade figures, the trade deficit stood at 2,090 million vatu indicating a deterioration of 303 million vatu compared to March 2009 and 496 million vatu when compared to February 2010.

In March 2010 total imports decreased by 8% from 2,481 million vatu in March 2009 to 2,276 million vatu. This was due to a decrease of 8% in Imports for Home Consumption from 2,478 million vatu in March 2009 to 2,275 million vatu in March 2010.

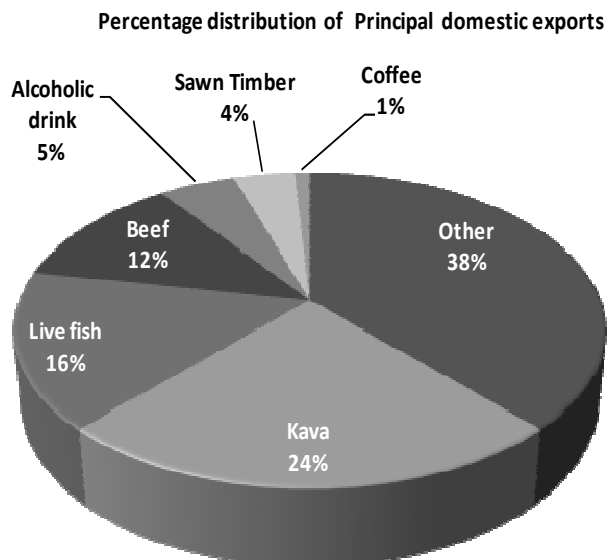

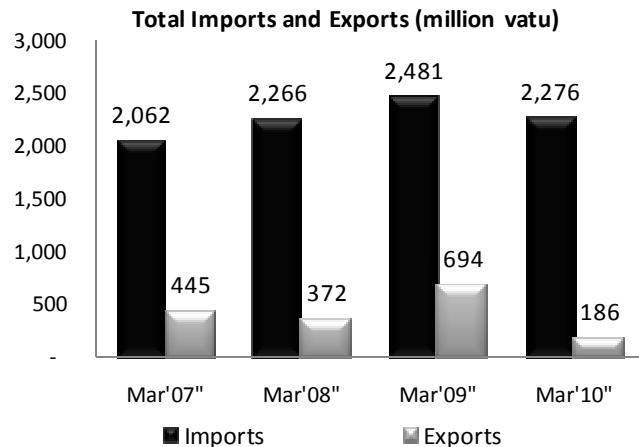

Domestic exports (excluding re-exports) for March 2010 decreased by 32% compared to the same period in 2009 from 272 to 186 million vatu. While exports in March 2010 increased compared to February 2010, exports of kava increased in value by 114% and other products 115% respectively.

Key Commodities

In March 2010, other products constituted 38% by total value, followed by kava 24%, live fish 16%, beef 12%, alcoholic drink 5%, sawn timber 4% and coffee representing 1%. Other includes products such as; sandalwood oil, fresh frozen fish, artifacts, and medicament items.

In terms of types of items imported, in the month of March 2010, machines and transport equipment had the largest value (C.I.F) representing 33% of the total imports for home consumption followed by basic manufactured products 16%, food and live animals 15%, chemical products 11% and miscellaneous manufactured goods representing 10%. The other groups made up less than 10% each of the total imports for home consumption.

Compared to March 2009, there were significant increases in March 2010 for imports of crude materials, goods N.E.C, beverages and tobacco, food and live animals and basic manufactured goods and while the rest of the imported items decreased; oils and fats, mineral fuels, chemical products machines and transport and miscellaneous manufactured goods altogether over the same corresponding period.

Source of Statistics: The Department of Customs and Inland Revenue provide the VNSO access to their ASYCUDA merchandise trade processing system to derive the imports and exports statistics included here.

Concepts and definitions

- **Imports for Home Consumption** are goods, materials or articles bought in other countries and brought into Vanuatu and cleared through customs procedures for home consumption. Imports for home consumption are valued on a C.I.F. (cost, insurance, freight) basis. This means that for each commodity, the value recorded includes the factory price, the cost of packaging, the freight cost from overseas to Vanuatu ports and the insurance.
- **Exports** are expressed in F.O.B. (free on board) prices. It means the total value includes the production cost and the transport cost to the Vanuatu port of export.
- **Imports for re-export** refers to imports destined to be re-exported without having undergone any transformation, or only minor ones. This is especially the case of duty free goods and fuel “imported” into the country and sold to non-resident airline operators or ships.
- **Re-exports** are goods, materials or articles exported in the same condition as they were imported, and imported goods, which have undergone operations such as repair, repacking, or bottling which leave them essentially unchanged before exporting.

• *Concepts and definitions for Vanuatu International Merchandise Trade statistics, sourced from the Customs and Inland Revenue Department (CIRD) data system (ASYCUDA), have undergone a major revision as part of the National Accounts Rebasing undertaken in 2009. The definitions for what constitutes an import for home consumption and an export are now consistent with international standards. The data series were reviewed and redeveloped from 1998 to date. There has also been a major improvement in the data exchange system between the CIRD and VNSO which has facilitated the data auditing, and a subsequent improvement in the data consistency checks for the series.*
