## VSO Update Overseas Trade, February 2011

### February Highlights

According to the February 2011 provisional trade figures, the trade deficit stood at 2,261 million vatu indicating a deterioration of 1,300 million vatu over the previous month and 711 million vatu over the same period of 2010.

The deterioration in February 2011 was due to an increase in total imports from 1,761 million vatu to 2,553 million vatu even though total exports increased by 38% compared to February 2010. The rise in total imports was due to an increase of 43 % in imports for home consumption which rose from 1,758 million vatu in February 2010 to 2,522 million vatu. Total exports, increased from 211 million vatu in the same period of 2010 to 292 million vatu.

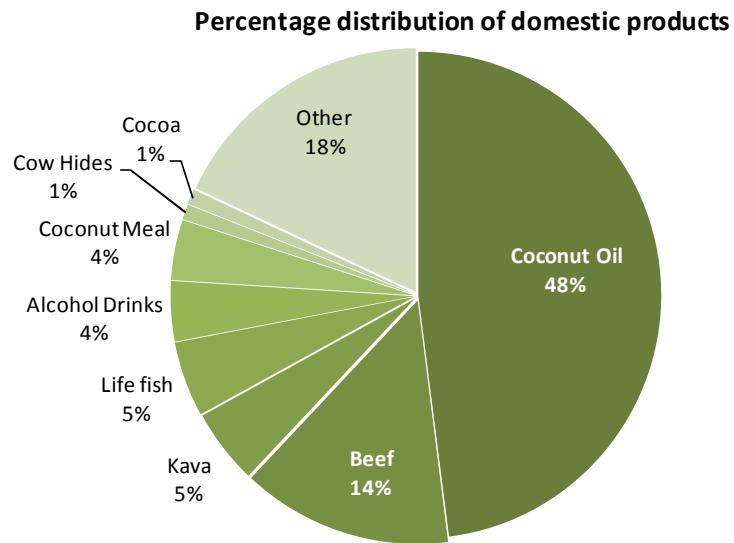

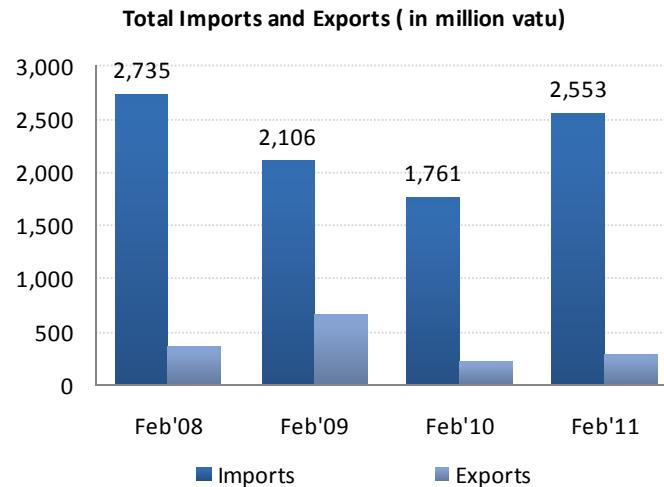

The significant increase in domestic exports was mainly attributable to a large shipment of coconut oil worth of 140 million vatu, followed by beef and cowhides representing 24% and 178% in value over the same period in 2010

### Key Commodities

In February 2011, coconut oil constituted 48 % of the total domestic exports in vatu terms, followed by beef 14 %, kava 5 %, coconut meal and alcoholic drinks 4% each and cocoa and cowhides 1% each. Other includes products such as: sandal wood oil, citrus fruits, personal effects, and medicaments.

Imports by commodity groups registered the largest value (C.I.F) of 920 million vatu in imports for mineral fuels, representing 36 % of the total imports for home consumption, followed by machines and transport 16 %, basic manufactured goods 13 %, food and live animals 12%, chemical products 10%, and miscellaneous manufactured goods 9 %. Other commodities such as beverages and tobacco, crude materials and oils and fats made up less than 10 % of the total imports for home consumption.

In February 2011, increases were recorded in imports of mineral fuels 166 %, miscellaneous manufactured goods 90%, beverages and tobacco 68%, basic manufactured goods 63%, and chemical products 19 % ,while the rest of the imported items recorded a decrease: oils and fats (-26%), goods not classified elsewhere (-24%), machines and transport (-17%), crude materials (-9%), and food and live animals (-3 %), when compared to February 2010.

## ***Revisions to imports and exports statistics***

*The Vanuatu Statistics Office receives imports and exports statistics data on quantity and value from the Department of Customs and Inland Revenue. On occasion revisions are made to import and export entries after publication by Vanuatu Statistics Office. The Vanuatu Statistics Office makes every possible effort to check the data published and resolved inconsistencies and anomalies with colleagues from the Department of Customs and Inland Revenue.*

*But sometimes revisions are necessary. This happened in exports of coffee in March 2010, and also for cocoa and kava exports in June 2010 which were revised after publication. These changes can only be highlighted as revised.*

**Source of Statistics:** The Department of Customs and Inland Revenue provide the VSO access to their ASYCUDA merchandise trade processing system to derive the imports and exports statistics included here.

### **Concepts and definitions**

- **Imports for Home Consumption** is goods, materials or articles bought in other countries and brought into Vanuatu and cleared through customs procedures for home consumption. Imports for home consumption are valued on a C.I.F. (cost, insurance, freight) basis. This means that for each commodity, the value recorded includes the factory price, the cost of packaging, the freight cost from overseas to Vanuatu ports and the insurance.
- **Exports** are expressed in F.O.B. (free on board) prices. It means the total value includes the production cost and the transport cost to the Vanuatu port of export.
- **Imports for re-export** refers to imports destined to be re-exported without having undergone any transformation, or only minor ones. This is especially the case of duty free goods and fuel “imported” into the country and sold to non-resident airline operators or ships.
- **Re-exports** are goods, materials or articles exported in the same condition as they were imported, and imported goods, which have undergone operations such as repair, repacking, or bottling which leave them essentially unchanged before exporting.

- *Concepts and definitions for Vanuatu International Merchandise Trade statistics, sourced from the Customs and Inland Revenue Department (CIRD) data system (ASYCUDA), have undergone a major revision as part of the National Accounts Rebasing undertaken in 2009. The definitions for what constitutes an import for home consumption and an export are now consistent with international standards. The data series were reviewed and redeveloped from 1998 to date. There has also been a major improvement in the data exchange system between the CIRD and VNSO which has facilitated the data auditing, and a subsequent improvement in the data consistency checks for the series.*
