

VNSO Update Overseas Trade, July 2010

July Highlights

According to the July 2010 provisional trade figures, the trade deficit stood at 2,411 million vatu indicating a deterioration of 708 million vatu compared to July 2009 and 734 million vatu when compared to the previous month.

In July 2010 total imports increased by 42% from 2,069 million vatu to 2,930 million vatu over the same period in 2009. This was due to an increase of imports for home consumption by 48% from 1,972 million vatu to 2,927 million vatu over the same month of the previous year.

Domestic exports earnings (excluding re-exports) for July 2010 amount to 519 million vatu representing an increase of 65% compared to the same month in 2009. This increase was mainly attributed to large shipments of coconut oil, and other export products that considerably increased during the month. The export value of other commodities also increased beef and live fish.

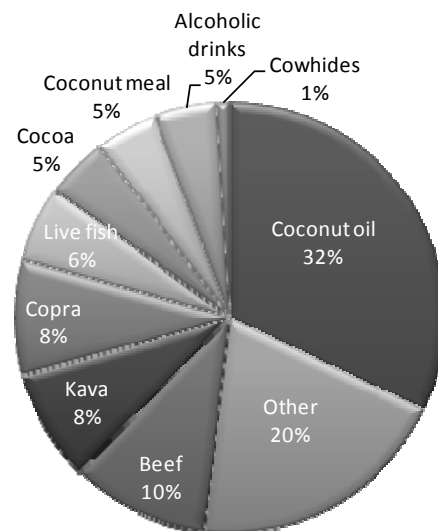

Key Commodities

In July 2010, Coconut oil constituted 34% of domestic exports by total value followed by other 21% beef 11%, kava and copra 9% each, live fish 6%, cocoa 5%, coconut meal, alcoholic drinks and cowhides exports made up less than 5% of the value total domestic exports. Other includes products such as sandalwood oil, personal effects, citrus fruits and medicaments.

In terms of types of items imported, during the month of July 2010 machines and transport equipment had the largest value (C.I.F) representing 30% of the total imports for home consumption followed by food and live animals 18%, basic manufactured goods 15%, and mineral fuels 14% other commodities such as chemical products, beverages and tobacco, goods not classified elsewhere and crude materials made up less than 10% of the total imports for home consumption.

Percentage distribution of domestic product

Compared to July 2009 significant increases were recorded for imports of mineral fuels in July 2010 from 72 million vatu to 405 million vatu. Significant growth in July 2010 compared with July 2009 occurred for machine and transport 75%, basic manufactured products 32%, food & live animals 31%, beverages and tobacco 26%, oils and fats 17%, and goods not elsewhere classified increased by 165% while the rest of the imported items decreased: crude materials (-27%), chemical products (-7%), and miscellaneous manufactured goods by (-1%) over the same month of the previous year.

Revisions to imports and exports statistics

The Vanuatu National Statistics Office receives imports and exports statistics data from the Department of Customs and Inland Revenue. On occasion revisions are made to import and export entries after publication by Vanuatu Statistics Office. The Vanuatu National Statistics Office makes every possible effort to check the data published and resolve inconsistencies and anomalies with colleagues from the Department of Customs and Inland Revenue.

But sometimes revisions are necessary. This happened in exports of coffee in March 2010, and also for cocoa and kava exports in June 2010 which were revised after publication. Documentation for these export shipments contained errors which were corrected after publication. These changes are highlighted as revised.

Source of Statistics: The Department of Customs and Inland Revenue provide the VNSO access to their ASYCUDA merchandise trade processing system to derive the imports and exports statistics included here.

Concepts and definitions

- **Imports for Home Consumption** is goods, materials or articles bought in other countries and brought into Vanuatu and cleared through customs procedures for home consumption. Imports for home consumption are valued on a C.I.F. (cost, insurance, freight) basis. This means that for each commodity, the value recorded includes the factory price, the cost of packaging, the freight cost from overseas to Vanuatu ports and the insurance.
- **Exports** are expressed in F.O.B. (free on board) prices. It means the total value includes the production cost and the transport cost to the Vanuatu port of export.
- **Imports for re-export** refers to imports destined to be re-exported without having undergone any transformation, or only minor ones. This is especially the case of duty free goods and fuel “imported” into the country and sold to non-resident airline operators or ships.
- **Re-exports** are goods, materials or articles exported in the same condition as they were imported, and imported goods, which have undergone operations such as repair, repacking, or bottling which leave them essentially unchanged before exporting.

Concepts and definitions for Vanuatu International Merchandise Trade statistics, sourced from the Customs and Inland Revenue Department (CIRD) data system (ASYCUDA), have undergone a major revision as part of the National Accounts Rebasing undertaken in 2009. The definitions for what constitutes an import for home consumption and an export are now consistent with international standards. The data series were reviewed and redeveloped from 1998 to date. There has also been a major improvement in the data exchange system between the CIRD and VNSO which has facilitated the data auditing, and a subsequent improvement in the data consistency checks for the series.
