STATISTICS UPDATE: CONSUMER PRICE INDEX

MARCH QUARTER 2017 HIGHLIGHTS

Figure 1: CPI per cent change over previous quarter

CPI QUARTERLY MOVEMENT

The Consumer Price Index (CPI) of March, 2017 indicated a slight increase of (+0.7 %). Port Vila both increased slightly by (+0.7%) and (0.5%) respectively, compared to the previous quarter. The expenditure group that contributed to the increase in the CPI were: Education (+3.2%), Transport (+2.3%), Food (+1.4%), Communication (+0.5%), Recreation (+0.4%), Drinks and Tobacco (+0.2%), and Health (+0.1%), however, Housing Utilities and Miscellaneous contributed a decrease of (-1.1%), respectively, and Clothing and Footwear contributed a decrease of (-0.5%). The main contributor in prices was due to the increases in price movements of Primary and secondary Private and Public School fees, Purchasing of Motor Vehicles, purchasing of Airline tickets, Fruits and Vegetables, and Mobile Phones, in both regions. However, the sub group that showed negative impact on the price movements were: purchasing of school Uniforms, Women and Men’s footwear in Port Vila and personal accessories in Luganville.

CPI ANNUAL MOVEMENT

When compared to the March quarter of 2016, the Vanuatu index increased by (+2.1%), Port Vila index increased by (+2.8%) while Luganville index dramatically decreased by (-1.5%). At national level, the expenditure groups that contributed to the increase over the same quarter of last year were: Food (+6.3%), Education (+3.2%), and Transport (+2.7%), Drinks and Tabacoo and Health (+0.1%) respectively. Thus, the increases in these expenditure groups were the result of increases in price movements of Fruits and Vegetables, school fees, and purchasing of new motor vehicle and airline tickets. However, the other groups that shows negative impact were Communication (-4.1%), Clothing and Footwear (-3.4%), Miscellaneous (-2.3%), Housing Utilities (-1.7%), and Recreation (-0.7%).

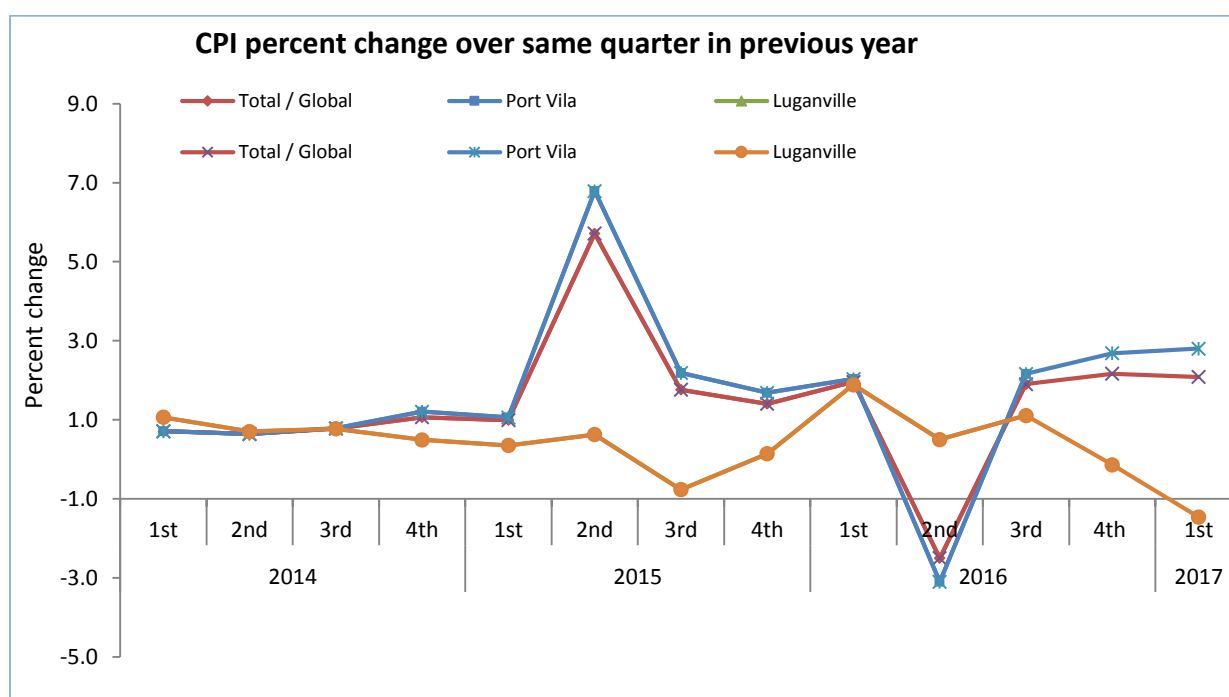

Figure 2: CPI per cent change over same quarter in previous year

UNDERLYING INFLATION

'Underlying inflation' is a measure derived from the CPI excluding items which typically have unstable or volatile prices; because of things like seasonal variation or policy decisions. Underlying inflation decrease by (-0.2 %) in March quarter of 2017 compared to the previous quarter December,2016. In addition, it also recorded decrease of (0.8 %) over the same quarter of 2016.

CONCEPTS AND DEFINITIONS

The Consumer Price Index (CPI) is used to measure the changes in the prices of goods and services purchased by households in Port Vila and Luganville over a period of time. The separate indices for these two major commercial centres are then combined to create the Vanuatu CPI.

This change in prices is sometimes called inflation. Retail stores, supermarkets, liquor outlets, transport operators, service stations and other providers of goods and services help supply the Vanuatu National Statistics Office with the information to calculate the CPI. Prices are collected for exactly the same goods and services each quarter. This ensures that changes in the cost of goods and services over time are not due to changes in the quantity or quality of the goods and services purchased.
