## DATA SOURCE AND REVISIONS

The Vanuatu National Statistics Office receives import and export statistics data on quantity and value from the Department of Customs and Inland Revenue's ASYCUDA World merchandise trade processing system.

The Vanuatu National Statistics Office will be releasing Provisional International Merchandise Trade Statistics highlighted in the monthly releases. On occasion, revisions are made to import and export entries after publication. Where revisions are necessary, these are highlighted in the statistical tables. The Vanuatu National Statistics Office makes every possible effort to check the data and resolve inconsistencies and anomalies with the Department of Customs and Inland Revenue prior to publishing of actual figures in Quarterly or annual Statistical Indicator report.

## CONCEPTS AND DEFINITIONS

- **Imports for Home Consumption** are goods, materials or articles purchased in other countries and brought into Vanuatu and cleared through customs procedures for home consumption. Imports for home consumption are valued on a C.I.F. (cost, insurance, freight) basis. This means that for each commodity, the value recorded includes the factory price, the cost of packaging, the freight cost from overseas to Vanuatu ports and the insurance.
- **Exports** are expressed in F.O.B. (free on board) prices. It means the total value includes the production cost and the transport cost to the Vanuatu port of export.
- **Imports for re-export** refers to imports destined to be re-exported without having undergone any transformation, or only minor ones. This is especially the case of duty free goods and fuel "imported" into the country and sold to non-resident airline operators or ships.
- **Re-exports** are goods, materials or articles exported in the same condition as they were imported, and imported goods, which have undergone operations such as repair, repacking, or bottling which leave them essentially unchanged before exporting.
